425 now and in the near future, including in places that were not previously known to flood. For example, by 2050, it is likely that sea-level
426 rise will meet or exceed 2.1 feet above 2000 levels, placing over 40,000 New Jersey properties at risk of permanent coastal flooding.
427 In addition, precipitation intensity in New Jersey is increasing at levels significantly above historic trends, placing inland properties at
428 greater risk of flash flooding. These and other coastal and inland flood risks are expected to increase within the life of a typical mortgage
429 originated in or after 2020.

436 year floodplain") according to FEMA's current flood insurance rate maps for your area?

437 [] [X] 128. Is any or all of the Property located wholly or partially in a Moderate Risk Flood Hazard Area
438 ("500-year floodplain") according to FEMA's current flood insurance rate maps for your area?

439 [] [X] [] 129. Is the Property subject to any requirement under federal law to obtain and maintain flood
440 insurance on the Property?

Properties in the special flood hazard area, also known as high risk flood zones, on FEMA's flood insurance rate maps with mortgages from federally regulated or insured lenders are required to obtain and maintain flood insurance. Even when not required, FEMA encourages property owners in high risk, moderate risk, and low risk flood zones to purchase flood insurance that covers the structure and the personal property within the structure. Also note that properties in coastal and riverine areas may be subject to increased risk of flooding over time due to projected sea level rise and increased extreme storms caused by climate change which may not be reflected in current flood insurance rate maps.

460 information about the flood risk of the Property and is used by flood insurance providers under the National Flood
